Paulo Guilherme de Souza Veiga

PROCESS & CONTINUOUS IMPROVEMENT ANALYST · I BUILD MY OWN TOOLS

Curitiba, Brazil gp.pgsveiga@gmail.com linkedin.com/in/pgsveiga github.com/mmbrosium Case portfolio: mmbrosium.github.io

SUMMARY

Data and process analyst trained inside high-volume customer-service operations. I come in through the operation, map where the routine jams and hand back the spreadsheet, dashboard or system the team starts using every day. Measured results: e-mail response time from 15–30 min to under 5; training lookup from 10 min to 30 s; a satisfaction dashboard over 80,000+ contacts/month used in bonuses and board presentations. When a spreadsheet is not enough, I build the tool (HTML, CSS, JavaScript).

EXPERIENCE

Customer-service agent · dental-plan operation · author of SisGeral
2026 – present · Curitiba

Built SisGeral, a contact manager in HTML/CSS/JS that opens with no install: procedure catalog, compiled record, history, calendar and productivity panel. Presented to supervision; fifty-plus iterations.

Own project · Ônibus Curitiba
2026 · mmbrosium.github.io/onibus-curitiba

Phone app with Curitiba's real transit timetables: Python extractors reduce the official GTFS (78 MB) to 55 KB of JSON; home–work route with transfer and a map of the lines (Leaflet). Public code.

Training · Foundever, Uber project
Sep 2025 – Mar 2026

A spreadsheet that guides the contact from choosing the issue to the standard reply (Rider Cash). Lookup from about 10 min to 30 s.

Customer-service agent → Continuous improvement · Concentrix, Smiles project
2024 – Aug 2025

- Guided spreadsheet for the e-mail front (Meus Voos): response from 15–30 min to under 5; adopted by the morning shift at the coordination's request.
- Covered the continuous-improvement analyst's vacation and took over the role: adherence and absenteeism (ABS), PSAT/DSAT over 80,000+ contacts/month, sales, cancellation and retention pipeline, re-routing report, access control.
- Work used in team follow-up, in bonuses and in presentations to the board.

Finance · Indaiá Restaurantes
2023 · Santa Catarina, Brazil

Issuing and tracking invoices and receipts, opening and closing the till, checking and fixing data in spreadsheets.

TOOLS

Spreadsheets: Google Sheets and advanced Excel (QUERY, FILTER, ÍNDICE+CORRESP, PROCX, ARRAYFORMULA, IMPORTRANGE, REGEX), Power Query, VBA.

Data and BI: SQL (queries, JOINs, aggregations), Power BI, Looker Studio.

Code: HTML, CSS and JavaScript for serverless tools. Learning Python.

Process: mapping (BPMN), Lean / Six Sigma, operations KPIs (PSAT, DSAT, ABS, AHT, conversion, retention).

EDUCATION AND COURSES

Associate degree in Systems Analysis and Development, Unicesumar · expected completion between 2026 and 2027.

Languages: Portuguese (native) · fluent English · intermediate Spanish.

LinkedIn Learning: Business analysis foundations · Business process modeling · Lean Six Sigma foundations · Strategic business analysis essentials · Business analysis: profession, skills and research · Decision-making strategy (2) · Project management foundations · Operations management foundations · Data analysis with SQL Server · Power BI: advanced techniques · Power BI: logistics dashboard · Excel: Power Query · First steps in Excel: data analysis · R for data science · Data engineering foundations · Programming foundations: databases · Microsoft Office.
